Respected Sir/Mam,

I hope you are hale and hearty and enjoying best of health. My name is Hassan Abdul Jabbar and I'm currently studying as a **bachelor student of Computer Science in (UET)**. As a student I am eager and energetic to learn new and upcoming technologies. As a student everyone focuses on CGPA however my focus is to learn new skills and polish my skills by working on projects. My primary focus is on expanding my skills. With the skills I possess, I am excited and fully energetic to serve the organization to my best level.

As far as academic achievements are concerned, I have secured **9th position in BISE Multan board** at intermediate level (1st year) which helped me secure admission in University of Engineering and Technology (UET) with flying colors. After first year I've gone through a storm of hardships and difficulties like a nightmare for any student. However, I continued to struggle with family problems along with my studies but I never lost hope. My strength is my dreams and my life goals that never let me slow down my pace of learning and upgrading my skills.

As a fresher, I want a opportunity to show, polish and excel my skills so that I can move forward one step towards my dream and to benefit the organization at my best. I am flexible in time management and problem solving skills.

I believe to be a good fit for your organization because of the skills and educational background I have. I have been waiting for this opening so that I could prove myself to be the best fit for organization. If you need any further information or any questions, please feel free to contact me. Thank you for your time. Have a nice day! JazakAllah Khaira

Kind regards,
Hassan Abdul Jabbar
